Art Unit: 2665

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-32 are rejected under 35 U.S.C. 102(e) as being anticipated by HO in U.S.

Patent No. 6,452,922 (of record).

By broadly interpreting the switch within the IP interface (304) as the claimed cross connect device, HO also discloses a method, apparatus and storage medium having computer program codes for cross connecting the incoming call to both the fallback call over a circuit switched network (106) and VoIP call over a VoIP network (108) based on continuously monitored quality of service of the VoIP network (see col. 2, line 23 to col. 3, line 45) as in claims 1-32.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Belzile is additionally cited to show the common feature of alternate call routing schemes using gateway/bridge between data and telephone networks similar to the claimed invention.

4. Applicant's arguments filed August 15, 2003 have been fully considered but they are not persuasive.

In the remark, the applicant argued that Ho reference does not redirect an already established VoIP call over a PSTN connection while the VoIP call is in mid-call as claimed.

Art Unit: 2665

The examiner disagrees for the following reasoning: In Ho, it does disclose the feature of redirect an already established VoIP call over a PSTN connection if the QoS of the call is below the desired threshold using a loop back path for providing a mid-call fall back scheme same as the claimed invention (see col. 2, lines 41-46, col. 3, lines 3-45). In view of the above reasoning, the examiner believes that the rejection of claims 1-32 under 102 (e) should be sustained.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alpus H. Hsu whose telephone number is (703)305-4377. The examiner can normally be reached on M-F (5:30-3:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D. Vu can be reached on (703)308-6602. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
